PROFESSIONAL SUMMARY

Senior Software Engineer with 9+ years of experience designing, developing, and maintaining cloud-native back-end systems using **Java**, **Spring Framework**. Proven track record delivering enterprise-grade solutions in banking, aviation, and mobility domains. Skilled in cloud migration with **Microsoft Azure** and third-party system integrations. Known for quick adaptation to new technologies, managing tight deadlines, strong analytical problem-solving, and effective cross-functional collaboration.

SKILLS & TECHNOLOGIES

Languages & Frameworks: Java, Spring Framework, J2EE, JUnit, OpenAPI, Hibernate.

Cloud & DevOps: Docker, Microsoft Azure - Kubernetes Services (AKS), Event-Hub, Service Bus, Logic Apps

Databases: Oracle, PostgreSQL, Redis, Hazelcast, Caffeine

Tools: Git, Splunk, Atlassian Tool Suite, Agile – Scrum/Kanban

WORK EXPERIENCE

adesso Turkey

Senior Software Engineer

Istanbul, Turkey

July 2024 – Present

- **Architecting** and leading back-end transformation of an **electric vehicle (EV) charging management system** from a white-label application to stand-alone services with **microservices architecture**. Achieving *x8 growth in customer numbers* and *x2 growth in charge-point numbers* along the way.
- **Integrated with an OCPP provider** for managing charge and charge-point data with sync/async communication methods including **webhooks**.
- **Engineered** critical third-party integrations including **payment providers**, regulation services (**GIB, EPDK and IYS**), notification services (**SMS, email, push notification**), and **SSO providers**, and enabling automated invoicing.
- **Implemented OCPI protocol** integration for e-Mobility Service Provider interoperability, expanding network compatibility and enabling seamless roaming across **multiple EV charging networks**.
- **Mentoring** promotion candidates.
- **Conducting interviews** for new candidates.

Tools: Java 21, Spring-Boot, Microservices, Hibernate, PostgreSQL, Redis, Caffeine, Maven, Azure Services (AKS, Event-Hub, Service-Bus, SendGrid), Firebase, OpenAPI, Splunk

Amadeus

Senior Software Development Engineer

Istanbul, Turkey

March 2022 – July 2024

- **Developed** a contract and airport billing system as part of **Airport Management Systems** within a global engineering team, improving billing accuracy and contract traceability across **multiple international airports**.
- **Designed** and delivered **Microsoft Azure Logic Apps** POC projects for cloud migration, accelerating the organization's transition to cloud-native architecture and reducing infrastructure overhead.
- **Maintained** the legacy **Java Swing** application, ensuring system stability.
- **Conducted** technical interviews and code-review sessions.

Tools: Angular 12, Java 17, Spring Framework, Oracle, Hazelcast, JUnit, Hibernate, Drools, Maven, JBoss, Azure Logic Apps

Şekerbank T.A.Ş.

Software Engineer

Istanbul, Turkey

December 2020 – March 2022

- **Built** middleware applications supporting digital banking channels including **Web/Mobile Branches, Call Centers**, and **IVR systems**, improving response reliability for thousands of concurrent users.
- **Developed** a **Backend-for-Frontend (BFF)** layer for the digital channels UI modernization project, decoupling front-end dependencies by deprecating JSP layer and enabling faster UI iteration cycles by using ReactJS.
- **Delivered** a **microservices transformation POC** for digital channels, collaborating with architects to lay the groundwork for the bank's modernization roadmap.

- **Maintained** a **legacy JSP/Servlet J2EE** web application, ensuring uninterrupted service availability during architectural transition phases.

Tools: Java 8, Spring Framework, Hibernate, OpenAPI, Maven, IBM WebSphere.

Turkish Airlines

Istanbul, Turkey

Software Engineer

September 2017 – September 2020

- **Developed** and maintained **mainframe applications** for reservation, ticketing, and **Departure Control Systems (DCS)**, supporting mission-critical operations for **one of the world's largest airlines**.
- **Migrated mainframe applications** to **Java-based systems** as part of enterprise architectural transformation, modernizing legacy infrastructure and improving maintainability and scalability.
- **Automated** manual tasks and test cases for **dumb terminals** using **Python**, significantly reducing manual effort and improving testing consistency across operational workflows.

Tools: IBM High-Level Assembler, AS/400 Mainframe, Java, Spring Framework, Python.

EDUCATION

Sakarya University

Sakarya, Turkey

Master's Degree, Information Technology

2018 – 2020

Istanbul Technical University (ITU)

Istanbul, Turkey

Bachelor's Degree, Electronics and Communications Engineering

2011 – 2015

LANGUAGE SKILLS

Turkish (Native)

English (Full Professional)

- **IELTS (International English Language Testing System)** | IDP Education | 2015
Reading: 9/9, Listening: 8.5/9, Speaking: 7/9, Writing: 6/9 | Overall Score: 7.5/9
- **TOEFL (Test of English as a Foreign Language)** | Educational Testing Service (ETS) | 2015
Reading: 26/30, Listening: 26/30, Speaking: 19/30, Writing: 21/30 | Overall Score: 92
